ESCP MARKETING BACHELOR · APPLIED GROUP PROJECT · TURIN

# Naya in Italy: the 2027 go-to-market

How Naya reaches, activates and keeps Italian university students. €30,000, January–December 2027.

**Il primo passo. Non l'unico.**

Nicolai Kauss · [Presentation date]

THE ANSWER ON ONE SLIDE

# The university gives Naya reach. 2027 is about trust and the second conversation.

### Who first

Fuorisede first- and second-years: 401,720 study away from home and report the highest distress.

### How we position it

Supporto emotivo di primo livello, offerto dal tuo ateneo. The villain: the gap between when you need to talk and when help is open.

### Shape of the year

Pilot in the winter exam session, scale before the summer session, spend hardest on freshers in September.

### How we'll know

North star: Monthly Supported Students. ≈7,000 by December, with ≥20% returning in month two.

MARKET

# Students need someone to talk to. Help is scarce and keeps office hours.

**9 in 10**

students report psychological distress

UDU, n=30,000

**~2%**

of students reach university counselling

Il Bo Live, 2023/24

**1 in 60**

Bonus Psicologo applicants funded in 2025

QuiFinanza / INPS

**35%**

of 18–24s use ChatGPT every month

Audiweb, Apr 2025

MARKET

# Four things that make Italy different

### Privacy is a headline topic

The Garante blocked ChatGPT in 2023 and fined Replika's maker €5M in 2025. Students ask where their chats go before what it does.

### AI adoption lags Europe

47% of Italians aged 16–24 use AI tools, against 64% across the EU. Not every student is an AI native.

### The exam calendar is the media plan

Winter exams Jan–Feb, summer Jun–Jul, freshers Sep–Oct. Blue Monday falls mid-session; 10 October 2027 is a Sunday.

### Universities want a digital front door

UniSiena's ABACUS chatbot books campus psychologists; Udine launched a self-help platform.

MARKET SIZING

# The sizing holds, if 30% means “would consider”

| Brief assumption | Our view | Why |
|---|---|---|
| SAM: 30% of students (≈610k) | Keep it, read as “would consider” | Between 41.8% of teens who turn to AI when low and 26.5% who seek help |
| Year-one activation | Plan on 5–6% of eligible students | Counselling reaches ~2%; instant free access should beat that |
| €20 per student per year | Defensible buyer price | Less than half one €49 online session; under one €50 Bonus voucher |
| Online universities (15%) | Out of scope for 2027 | Different students, no campus to activate |

COMPETITION

# The real competitor is “nothing”, and ChatGPT at 2 am

| Alternative | Where it falls short | How Naya wins |
|---|---|---|
| Pushing through, friends | “Non voglio pesare sugli altri”; no one awake at 2 am | Private, available now, no burden |
| ChatGPT, Gemini, Claude | Built for everything; forgets you; no route to a person | Psychologist-set rules, memory, a bridge |
| University counselling | ~2% reach; weeks between sessions | Fills the gap between appointments |
| Unobravo, Serenis | €49 a session; opening up to a stranger | A lower-friction first step towards them |
| Wysa, Ash, Youper | English-first, paid, not linked to campuses | Italian, free via the ateneo, local |

WHY NAYA OVER CHATGPT

# One sentence, four reasons

Perché non usare ChatGPT?

ChatGPT is built to answer everything. Naya is built for one thing: helping you talk it through, and knowing when a person should take over.

**A bridge to real people**
University counselling or a Bmind psychologist

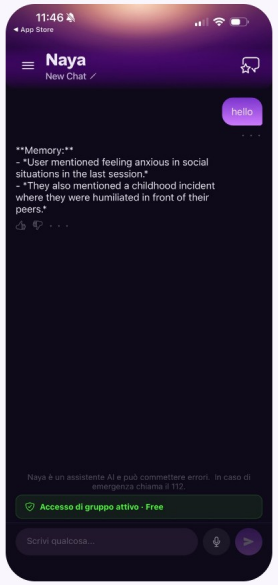

**Rules set by psychologists**
Clinical policies decide, not the model

**Remembers and checks in**
“Com’è andato l’esame?”

**Privacy in three lines**
Said upfront, before anyone asks

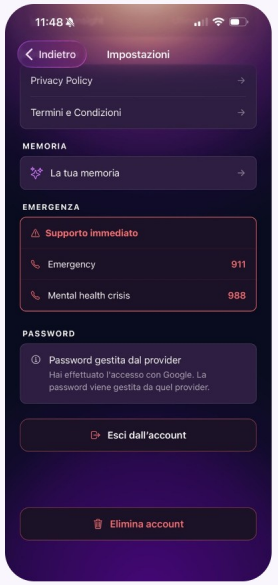

WE TESTED NAYA PLUS

# Five things to fix before we spend a euro

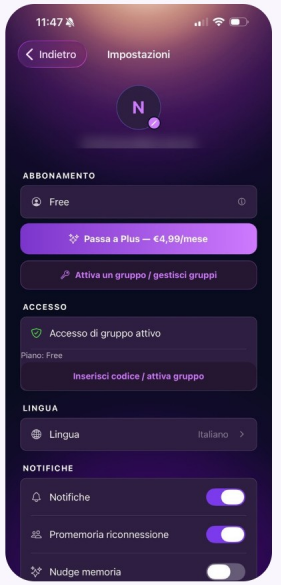

## 1 · Memory leak on “hello”

A new user sees raw notes about someone else. Kills the privacy promise.

## 2 · US emergency numbers

911 and 988 in Settings; the chat footer correctly says 112.

## 3 · The code is buried

Shows “Free” and a €4,99 upgrade until the student finds Settings → Inserisci codice.

Also: the App Store says “Here with me you are safe” and “completely anonymous” (against our own guardrails), and the listing is English-only.

PRIMARY RESEARCH

# Six bets we test before we spend

| # | Hypothesis | Test |
|---|---|---|
| H1 | Being offered by the ateneo builds more trust than AI-privacy fears remove | MaxDiff: trust drivers |
| H2 | “Will my university read my chats?” is the #1 barrier | MaxDiff: barriers |
| H3 | A visible bridge to a person makes students more willing to try | Headline A/B + €200 ad test |
| H4 | Memory and check-ins are reason enough to switch from ChatGPT | Interviews, concept card |
| H5 | Peer channels beat official email per student reached | Channel question + pilot UTMs |
| H6 | Installs peak 2–3 weeks before a session, not during it | Survey + pilot data |

24 interviews | Survey n=400 · 3+ atenei | Landing-page test | Oct–Nov 2026

TARGET PERSONAS

# Lead with Giulia: highest need, clearest trigger

PRIMARY

### Giulia, fuorisede matricola

19, from Lecce, first year Law at UniTo, shared flat

> When I feel alone in a new city, help me say it out loud without worrying my mum.

**Trigger** · Weeks 3–8 after moving; first sessione

**Reach** · Welcome days, EDISU residences, freshers' Telegram

SECONDARY

### Marco, in sessione

21, third year Engineering, one exam behind

> When it's 2 am before an exam and my head won't stop, help me get it out and plan tomorrow.

**Trigger** · 2–3 weeks before each session; a failed appello

**Reach** · Course groups, reps, TikTok and Instagram

OPTIONAL

### Amina, international

22, Master's at PoliTo, first Italian winter

> When things pile up here, help me talk it through in my language.

**Trigger** · Arrival; November–February

**Reach** · ESN, international office, English emails

CUSTOMER JOURNEY

# Six steps, one job and one metric each

### 1 · Aware

Co-signed university email; reps repost in course groups within 48 h; stealth QR cards

**% aware (pulse survey)**

### 2 · Consider

“Cosa Naya è / non è” page; privacy in three lines; a Bmind psychologist on camera

**Landing page → store**

### 3 · Activate

Group code on the welcome screen, not buried in Settings; starter prompts in Italian

**Plus accounts / eligible**

### 4 · First value

“Ciao, sono Naya. Come stai?” → a short first talk that ends with one plan

**≥60% send 3+ messages**

### 5 · Return

Check-in two days later: “Com’è andato l’esame?”

**≥20% month-2 return**

### 6 · Bridge

In-app route to the university service or a Bmind psychologist

**Completed requests, never a target**

POSITIONING

# Not a wellness app. Not AI therapy. A first step.

For Italian university students carrying pressure alone, Naya is a first, safer place to talk things through, at any hour, free through your university. Unlike general chatbots, it is built with psychologists, designed with dedicated safety mechanisms, and connected to real people.

## CATEGORY

Supporto emotivo di primo livello, offerto dal tuo ateneo

## VILLAIN

The gap between when you need to talk and when help is open

## POINT OF DIFFERENCE

Free through your ateneo, and connected to its own counselling

## TAGLINE

Il primo passo. Non l'unico.

MESSAGING HOUSE

# One platform, three pillars, localised not translated

## Parlane.

**Tagline · Il primo passo. Non l'unico.**

### Sempre lì

"Esame alle 9, pensieri alle 3? Parlane con Naya."

Any hour; remembers you; checks in before your appelli

Answers "Non c'è nessuno adesso"

### Più sicuro per progettazione

"Progettato con psicologi. Con meccanismi di sicurezza dedicati."

Clinical policies decide, not the model; GDPR

Answers "E i miei dati?"

### Il ponte verso le persone

"Quando serve una persona, Naya ti aiuta a trovarla."

Escalation logic; university counselling; Bmind psychologists

Answers "Vuole sostituire lo psicologo?"

2027 ROADMAP

# The exam calendar sets the rhythm

| Phase | When | Focus | Budget |
|---|---|---|---|
| 1 · Pilot | Jan–Feb | Soft launch at 3 Piedmont atenei before the winter session | €4,500 |
| 2 · Second semester | Mar–May | Founder letter, ambassadors, creators; paid test in cheap April | €7,500 |
| 3 · Summer sessione | Jun–Jul | “Modalità sessione” content; pre-session check-ins | €4,500 |
| 4 · Prep | Aug | Wave 2 toolkits, creator bookings, AEO pages | €1,500 |
| 5 · Freshers push | Sep–Oct | Welcome days at 8 atenei; Settimana del Parlane, 4–8 Oct | €10,500 |
| 6 · Retain and prove | Nov–Dec | Pre-session check-ins; Barometro della Sessione report | €1,500 |

**Gate · paid scales at a campus only once ≥20% of its students return in month two**

CHANNEL MIX

# The university lends trust, peers carry it, paid amplifies

| Channel | When | Budget | KPI |
|---|---|---|---|
| University email + portal banner | 2 weeks before each session | €0 | Click → activation |
| Counselling “between appointments” | Always on | €0 | Activations tagged |
| 10 campus ambassadors | Jan–Dec | €4,000 | Installs per UTM |
| Stealth QR, pop-ups, welcome stands | Pre-session; Sep–Oct | €6,000 | Scans per location |
| ~10 student micro-creators | Mar–May; Sep–Oct | €5,500 | Installs per code |
| ScuolaZoo or Skuola.net package | Jun; Sep | €1,500 | Reach, clicks |
| Paid Meta + TikTok, geo-fenced | Apr–May, Jun, Sep | €7,500 | ≤€4 per activation |
| AEO pages + “Trova lo sportello” map | From Aug | Production | AI citations |

Not doing: national OOH or TV, Blue Monday stunts, paid referrals, streaks, fake testimonials.

BUDGET: €30,000

# A third buys presence on campus; paid waits for proof

| Line | € | Share |
|---|---|---|
| Campus activations and events | 6,000 | 20% |
| Paid social (gated) | 7,500 | 25% |
| Student micro-creators | 5,500 | 18% |
| Campus ambassadors | 4,000 | 13% |
| Content and video production | 3,000 | 10% |
| Student media partner | 1,500 | 5% |
| Research and testing | 1,500 | 5% |
| Contingency | 1,000 | 3% |
| Total | 30,000 | 100% |

**≈21,500**
activated students by December

**€1.40**
per activated student, blended

**≈7,000**
Monthly Supported Students in December

MEASUREMENT

# We count real use, not downloads

North star

## Monthly Supported Students

Students with a meaningful conversation or a completed check-in in the last 30 days. Target ≈7,000 in December 2027.

**Decision rule** · return below 10% at a campus: freeze its creator and paid spend. At 20% or more: release paid.

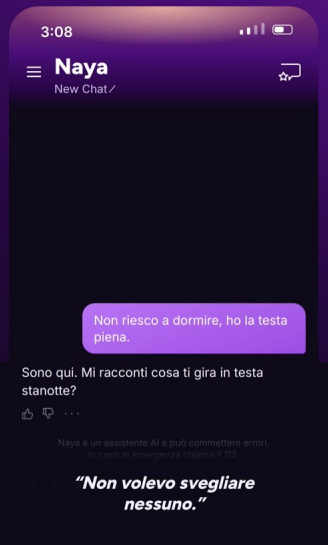

| Stage | Metric | Target |
|---|---|---|
| Awareness | % of eligible students aware | 40% (50% of freshers) |
| Activation | Plus accounts / eligible | 6% Wave 1 · 5% Wave 2 |
| First value | 3+ messages in session one | ≥60% |
| First value | Check-in accepted in session one | ≥40% |
| Retention | Month-1 → month-2 return | ≥20% |
| Trust | In-app trust pulse | ≥4 / 5 |

VIDEO AD · “LE 3:07”

# An ordinary heavy night, not a crisis

**0:09** · Ciao, sono Naya

**0:16** · She says it

**0:29** · Parlane. Anche alle 3.

**0:34** · Com’è andato l’esame?

**0:46** · The bridge to a person

**0:58** · Il primo passo

60s vertical, Italian, built in Naya’s own UI. Cutdowns: 30s, 15s, 6s bumper. No distress shown; the psychologist is the destination.

RISKS AND NEXT STEPS

# Two answers and two fixes unlock the plan

## Questions for Bmind

- Fix the memory leak and the 911/988 numbers before any pilot
- Which atenei go live in January, which in September?
- What can a partner university see of student chats?
- Can the group code move to the welcome screen?
- Does Naya support English?

## Our next steps

- Log every friction point in Naya Plus for 7 days
- Launch the survey on 10 October
- Run 24 interviews by 6 November
- Re-score personas and the hero message with data
- Shortlist creators; cut the 30s and 15s versions

# Parlane.

## Il primo passo. Non l'unico.

Naya is a first layer of emotional support, designed with psychologists. It is not therapy and not an emergency service, and it complements human care.
